Democratic Republic of the Congo

Democratic Republic of the Congo is one of the most affected countries in Africa by the MALARIA. The deaths average in the year is about 15k. From the dashboard "Malaria deaths in Africa: 2000-2014", when I clicked on Democratic Republic of the Congo on the map, this showed from 2000 to 2003 the deaths total was very low, then from 2004, the deaths average started to increased significantly, reached a maximum rise in 2013 with a rate of 30k deaths.

Malaria Deaths in Africa: 2000-2014

Which countries are most affected?

Darker shading marks a higher number of deaths caused by Malaria. Select a country on the map to explore how the number of malaria deaths have changed over time.

How have the number of malaria deaths changed over time in **Democratic Republic of the Congo**?

Chad

We also note through the dashboard "Malaria deaths in Africa: 2000-2014", when I clicked on Chad, this showed the deaths rate at the beginning of 2001 was very increase and then significant decrease in 2002, then it increased during 2003. In 2004 was the year with the lowest number of malaria deaths in Chad. Then it continued to rise until it reached the highest deaths rate in 2013.

Gabon

From the dashboard "Malaria deaths in Africa: 2000-2014", I clicked on Gabon, which showed me the deaths per year due to malaria in Gabon have been decreased significantly since 2003. Before 2003, there were about 1000-2000 deaths per year. After 2002, deaths were reduced to about 600-200 per year.
